

Letters

With closed eyes and open minds
We look towards a better time
With our brothers by our side
Closed eyes and open minds

Holed up inside, safe from the reign
Freedom means release from pain
Power to the people, that's what we gained
Holed up inside, safe from the reign

Love who you want, want who you love
Preach what you know, feel from above
Find your peace and follow your dove
Love who you want, want who you love

Instrumental solo verse (do doos and ooohs)

Live and let live, its just letters in a name
Everyone's different, but we're all the same

Live and let live, its just letters in a name
Everyone's different, but we're all the same

Live and let live, its just letters in a name
Everyone's different, but we're all the same

Live and let live, its just letters in a name
Everyone's different, but we're all the same
